

GRANITE-COLOR

Remnants of Paint? The circular stone may be showing that it was painted. Note that there is two X's cut on that stone and the knotted stone below it. Upper left corner of that stone. Note the other granite stones are not the same shade of color as the round stone. Can this be part of the tradition of painting over runes that was done in Europe. The color seen is not normal to see.

Gary Gianotti Oct-2014
