

Reverse Hooked X

Can this Be like the Orkney Stone- Reversed Hooked X

My Favorite Castle

Dates are not 1800's, Look close at the first set of numbers. The number 8 as Brody claims, it is 1328. Top of "3" shows the distinct, rounded cut like on the other "3" examples found. Also it looks like a "2", because some one went over the numbers. The second set of numbers, "WHERE" is there an 8? 1235? and the 4th set of numbers are not numbers, they are symbols, Maybe arabic numerals and the "8" is maybe a hooked X. Mr. Brody, lacks the experience in identification. Pope was teaching Arabic numbers(900's)

Note that the top set of numbers(8) is cut in the 11:00 to 5:00 position. The stone that says maybe 1208, that "8" is cut on the same angle that may indicate the same person did the work. If this is 1200's from the stone on the 1st page. Alan Fitz Walter, 2nd High Steward was Patron of the Templars in Scotland. He died in 1204!
